

Golden Egg - Water System

Little Batteries up to 5 Gallons

1 Fill a Clean Bottle *up to 5 Gallons of Water Bottle to the RED line as indicated in the above Diagram

2 Insert into the Bottle the Golden Egg

3 Cover the Bottle with a Cloth in so that the Chlorine can Evaporate Then place the Bottle in Direct or Indirect Sunlight for the Next 24-Hours.

This will allow the ChlorFree Ionizing Capsule to Produce an Adequate Concentration of Ions and Evaporate the Presence of Chlorine.

4 After 24 hours, stir or mix the Water in order to completely distribute the Concentrated Ionization throughout the container. Within seconds, the water will be Completely Ionized and consequently Disinfected. You will also notice that the Water becomes Sparkling Clear with a Clean, Sweet, Natural Taste and Smell.

To use both the Gold and Blue Eggs, you must first use the GoldenEgg for the First 3 Steps, then Change the Golden Egg with the Blue Egg in Step-4 in order to Maintain 'Water Purification'.

*5-gallons of ordinary 'Tap Water' within a period of 24 hours; 1-gallon of ordinary 'Tap Water' in just 5-hours and 1-liter of ordinary 'Tap Water' within a period of 1 1/2-hours.

The Difference between the GoldenEgg and the BlueEgg

The GoldenEgg assures Purification of Contaminated Water and to Prevent Virus & Bacteria

The BlueEgg assures Purified Tap Water in order to Prevent the Growth of Bacteria

Water Test with Golden Egg

Contaminated Water 12-hours later 24-hours later
